

Saving our clients money is what we do.

WHO WE ARE

Quadrangle Energy LLC is one of the preeminent energy brokers in the country. Our leadership team has over 50 years of combined experience within the top companies in the category. This experience involves wholesale energy trading, the formation and sale of one of the largest retail electric providers in the nation and subsequently the formation and sale of the nation's second largest retail energy broker.

We formed Quadrangle Energy LLC to bring all of our knowledge, understanding and connections together in one place to help companies save money on energy.

Our goal is to create and execute a custom energy strategy for our clients. We are fiercely independent which allows us to explore any and all options that will help us accomplish this goal.

Quadrangle Energy: "Rounding the four corners of business: Service, Experience, Execution and Results."

WHAT WE DO

Saving our clients money on energy usage is what we do. Period. How we are able to accomplish this is as unique as each of our clients. Purchasing electricity at the best price is complicated. Over 30 different variables go into electricity pricing. Some people out there offer a "one size fits all" formula when it comes to energy. But we all know that with so many options and variables "one size" can't fit all. Which is why Quadrangle approaches every client differently because no two clients are exactly alike.

While purchasing energy can be complex, Quadrangle makes it simple and painless for our clients. And the best part is: Our energy audit of your business is absolutely free.

In general our approach encompasses the following three stages:

Phase 1

We take the time to understand your business. It sounds simple enough, but we know your business is not like any other. Things like risk tolerance, number of locations, geography, budgets, etc. all vary by client. The good news is no matter how many or what these variables are, Quadrangle can help. We call this our energy audit.

Phase 2

Once we understand your business, we get to work developing a strategic energy plan that is customized for you. Based on what we learned about your company in Phase 1, we will explore numerous options to find a solution that fits with your energy objectives. And because we are an independent broker, we have the ability to explore any and all solutions that make sense. This is how we are able to make our strategic energy plan unique to you.

Phase 3

Present Quadrangle's strategic energy plan to you. This is where we show you the strategy and associated tactics that we recommend to save you money on your electric bill. We will get into the specifics of how to buy, use and manage your electricity. And by the way, if after our analysis we determine you already have a terrific deal in place and we cannot beat it, we will tell you that too.

Stop wasting money on your electric bill.
